

IN THE SPECIFICATION

Please change the paragraph spanning lines 3-11 page 7 as follows:

- 5 The components 102, 104, 106 are coupled to the facility 111 ~~server 114~~ by one or more links 110. Such coupling may be "always one", for example DSL or cable, or it may occur at selected times, for example by dial-up telephone access. The links 110 may comprise wired communications links, wireless links, satellite, telephone lines, DSL lines, cable connections, public Internet, private
- 10 Intranet, Ethernet cards, wide or local area networks, or any other arrangement suitable for the purposes described herein. The link 110 includes appropriate equipment to modulate/demodulate, encode/decode, multiplex, and perform other processing to connect many users to the online facility 111.

- 15 Please change the paragraph spanning lines 9-13 on page 15 as follows:

- During presentation of the consolidated listing in step 502, an "active synch" operation 502a is also performed. Namely, during display of the consolidated listing at the member's computer, the finder 109 updates the display
- 20 in real time to include any data objects that are first logged into the catalog 112a while the member's search window is open.
